

RegalFrame®

metal doorframes
to suit brick construction

The welded RegalFrame has a built-in architrave to give a timber look doorframe with the added strength and durability of a metal doorframe. JDS Metal Doorframes designed and developed the RegalFrame in close consultations with the building industry in developing a superior doorframe.

Technical Specifications

The RegalFrame is made from a 1.05mm Zincanneal.
Available in 95 or 114 B/O in a wide range of standard door heights and widths.
